## EXPERIENCE

### Pudink

June 2015 - Present

#### Front End Developer

- Implemented multiple websites available for child care centers to easily customize using the Pudink dashboard application.
- Collaborated with designers to develop UI mockups optimized for custom content and styles.
- Improved existing websites by modifying page content structures and fixing technical issues including cross-browser compatibility and responsive styling.
- Provided bug fixes and general improvements to the internal dashboard and corporate website.

### Lawrence Livermore National Laboratory

June 2014 - September 2014

#### Web Application Developer

- Created a web application for requesting new user accounts and equipment.
- Designed and implemented a dynamic user interface for performing relational database queries.
- Worked with clients directly to implement and improve upon features.
- Collaborated with peers in developing reusable code based on OOP principles.

### Cal Poly Pomona University Housing Services

September 2013 - June 2015

#### Technology Student Assistant

- Diagnosed and debugged technical issues for student and faculty systems in the University Housing office and dormitory networks.
- Documented help desk tickets and resolutions.
- Assisted in installing and maintaining hardware and software.

---
